📄 Curriculum Vitae: <https://classy-faizu.github.io/virtual-cv/#home>

Professional Summary

Motivated and detail-oriented final-year Bachelor of Science in Information Technology student at North-West University with a current academic average of **70%**. Passionate about software development, artificial intelligence, machine learning, database systems, networking, and cybersecurity. Experienced in developing academic projects using Python, Java, C#, C++, SQL, Oracle Database, and Cisco Packet Tracer. Continuously expanding technical skills through hands-on learning and practical projects. Seeking an internship or graduate opportunity where I can contribute, learn, and grow as an IT professional.

Education

North-West University (NWU) – Potchefstroom Campus

Bachelor of Science (BSc) in Information Technology

Expected Completion: 2026

Current Academic Average: 70%

Technical Skills

Programming Languages

- Python
- Java
- C#
- C++
- SQL

Database Technologies

- Oracle Database
- Database Design

Networking

- Cisco Packet Tracer
- Routing & Switching Fundamentals

Artificial Intelligence & Machine Learning

- Google Teachable Machine
- K-Means Clustering

Cybersecurity

- Networking Fundamentals
- Defensive Security
- Offensive Security
- Cryptography Fundamentals
- DevSecOps Fundamentals

Software & Tools

- Microsoft Office Suite
- GitHub

Professional Skills

- Problem Solving
- Analytical Thinking
- Teamwork
- Communication
- Time Management
- Adaptability
- Continuous Learning

Academic Projects

Hand Gesture Recognition System

Technologies: Google Teachable Machine

Developed a machine learning model capable of recognising hand gestures in real time using a custom-trained image dataset. The project demonstrates practical applications of image classification and introductory computer vision concepts.

Transport Management Database System

Technologies: Oracle Database, SQL

Collaborated in a team to design and develop a transport management database system. Created conceptual, logical, and physical database models to manage inventory, driver assignments, and transport records while applying database design principles.

Network Design & Simulation

Technologies: Cisco Packet Tracer

Designed and simulated a computer network by configuring routers, switches, IP addressing, and network connectivity. Applied networking principles to build and test a functional network topology.

K-Means Clustering Analysis

Technologies: Python, NumPy, Matplotlib, scikit-learn

Implemented the K-Means clustering algorithm to analyse datasets, identify meaningful patterns, and visualise clustered data while demonstrating the application of unsupervised machine learning techniques.

Technical Training

TryHackMe – Cybersecurity Learning

Completed practical cybersecurity learning modules covering:

- Networking Fundamentals
- Defensive Security
- Offensive Security
- Cryptography
- DevSecOps

- HTTP Request Smuggling
 - macOS Forensics
-

Work Experience

Sales Assistant & Administrative Support (Part-time)

Family Business

- Assisted customers with product enquiries and provided professional customer service.
 - Processed sales transactions accurately using the point-of-sale system.
 - Performed computer-based administrative tasks and maintained business records.
 - Supported daily business operations while working effectively within a team.
-

Achievements

- Maintaining a current academic average of **70%**.
- Successfully completed practical projects in Artificial Intelligence, Machine Learning, Database Design, Networking, and Cybersecurity.
- Actively developing practical cybersecurity skills through the TryHackMe learning platform.
